

Problem statement

Create a blog that consists of the following pages

1. Blog pages

- Show a list of blog posts
- Admin or author of the post can edit
- “Add new” action button at the top right corner of the page

2. Blog view: page

- Display the content of the post
- Logged-in users can comment
- Admin or author can hide a comment
- The comment is shown in the tree view

3. Admin Page

- Show all posts
- Admin can hide any post
